

SEC³URE HCIR | Release Notes – 6/13/2017

Intellcentrics is proud to officially release our latest version of SEC³URE for HCIR / Vendor Reps. This version is automatically available when logging-in. This latest release addresses minor bugs and introduces the IntelliCentrics Quick Track | Community Compliance (*through ClearStar Medical Information Services*) credential automation into SEC³URE.

Features included in this release:

- IntelliCentrics Quick Track | Community Compliance.
In a partnership with ClearStar Medical Information Services, SEC³URE now provides the option to Purchase and Schedule lab testing directly from the outstanding credential requirement or through My Subscriptions.
Once the lab test results are complete, ClearStar will send detailed lab test results directly to the HCIR. Then the HCIRs SEC³URE credential requirement is also automatically updated depending on the results (*“On File” / Current or “Not on File” remains outstanding*). Please note: IntelliCentrics SEC³URE will never see the detailed lab test results.
Located under: My Account > Credentials & My Subscriptions

System Requirements for SEC³URE:

- Microsoft Windows 7 or above
- Internet connection using the latest browser versions of: [Microsoft IE 11](#) | [Microsoft Edge](#) | [Google Chrome](#) | [Mozilla Firefox](#)
- Latest version of Adobe Acrobat Reader: www.adobe.com
