

SEC³URE HOST ADMIN | Release Notes – 11/16/2017

Intellcentrics has officially released our latest version of SEC³URE for Host Administrators. This version is automatically available upon Facility Host Administrator login. This latest release addresses minor fixes and adds a new Facility Radiation Exposure report. You will also see a change to the SEC³URE Kiosk.

Features included in this release:

- SEC³URE NEW Facility Radiation Exposure Report**
 The **Facility Radiation Exposure Report** shows HCIR / Rep compliance for both *Radiation Exposure* and *Radiation Training* credentials in your facilities. Monitor your HCIR / Rep populations and quickly respond to radiation exposure events.
Located under: REPtools > NEW Facility Radiation Exposure Report
- SEC³URE Kiosk Check-in | Removed Registration Option at the Kiosk**
 We've received a lot of HCIR feedback concerning lines at SEC³URE kiosks. To help alleviate check-in wait times, we have removed the registration option from the SEC³URE kiosk. New-to-SEC³URE vendor reps should be instructed to download the SEC³URE Mobile App instead. Available for both  Apple iOS and  Android devices
*For more information: [HCIR / Rep Compliance Guide](#) (*PDF)*
- Mozilla Firefox v57.0 (Quantum)**
 Mozilla recently released their latest version of Firefox (Quantum) version 57.0. We've performed extensive testing with all SEC³URE applications (HCIR, Facility Host Admin, and Kiosk) and have not experienced conflicts or issues using this browser.

System Requirements for SEC³URE:

- Microsoft Windows 7 or above
- Internet connection using the latest browser versions of: [Microsoft IE 11](#) | [Microsoft Edge](#) | [Google Chrome](#) | [Mozilla Firefox](#)
- Latest version of Adobe Acrobat Reader: www.adobe.com
